

Introduction - Creativity and Innovation in Higher Education. Priorities of the Faculty of Engineering

Halvor Austenå
Dean

Department of engineering ad innovation

- Large national educational provider for industry and public sector
- The national frame curricula for our demand learning objectives within innovation and entrepreneurship
- Our main customers are regional and national organizations

Our customer's modes of innovation

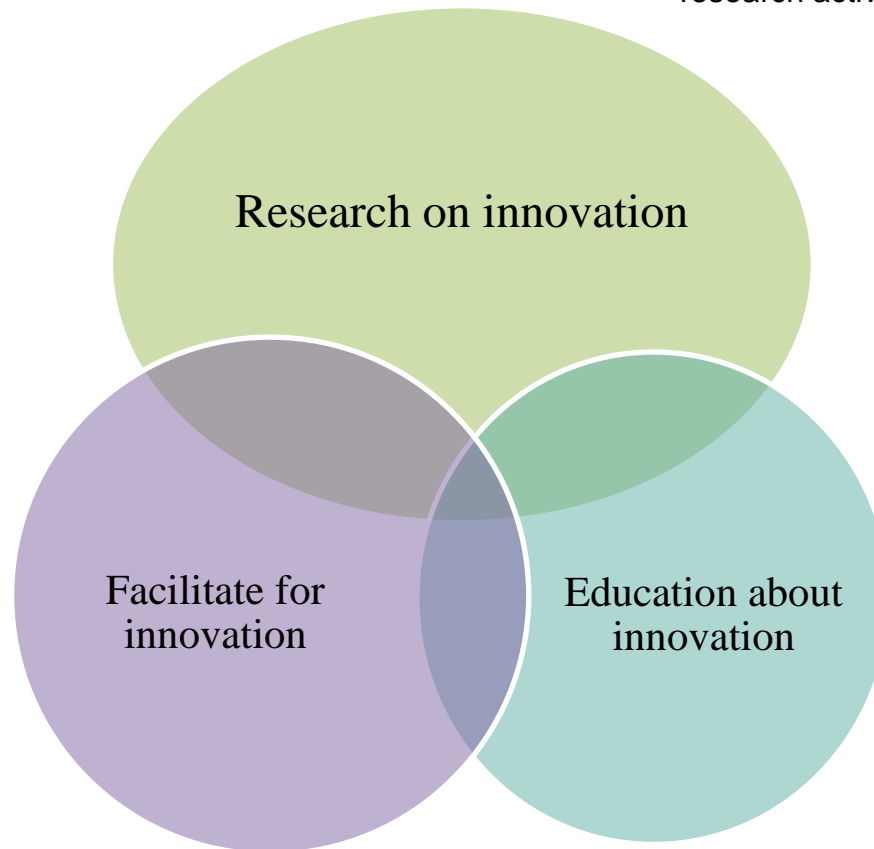

- STI or DUI?
 - Mainly in between but tilting at DUI.
- Consequences for education:
 - practical studies and «real world» cases/problems
 - Programs to increase innovation capability for example within health technology and in scientific subjects in the educational systems (Sim Subsea)
- Entrepreneurship and incubation activities

Centre for Innovation (Bergen University College)

Research and Competence Centre in Innovation and Entrepreneurship

High quality research related to regional industry, to education, and other research activities at BUC.

Promote collaborative projects between R&D-institutions, industry, and public sector

Promote research based education within innovation and entrepreneurship

Centre of Innovation: Objectives

- i) Research: High quality research with important impact in the region, the educational programmes at the university college and for the overall research at the university college
- ii) Operation: Promote entrepreneurship and innovative collaborational projects between R&D institutions, enterprises and the public sector.
- iii) Education: Promote research based education at the university college within the Center's areas of knowledge.
